Address: Door no 5 JJ nagar
Kalapatti, Coimbatore

MAREESHAN V

PYTHON DEVELOPER

ABOUT ME

Passionate Python developer with 1.7 years of experience in building robust and scalable applications. I am dedicated to leveraging my programming skills to deliver high-quality solutions that meet client needs. During my 1.7years as a Python developer, I have gained expertise in various Python frameworks such as Django and Flask, as well as proficiency in database management systems like MySQL and SQLAlchemy. I have a deep understanding of object-oriented programming (OOPs) principles and have utilized them effectively in my projects. If you are looking for a dedicated Python developer with a strong problem-solving mindset and a passion for clean and efficient code, I would love to connect and explore potential collaboration.

PROJECT

PROJECT NAME: EATEREASE

Our innovative Cafeteria Solution aims to optimize food ordering and slot booking processes within an organization like colleges or companies, effectively reducing conflicts and wait times during break hours. Leveraging cutting-edge technologies, including Flask, JavaScript, and third-party APIs like Flask-Dash, Flask-Admin, Flask-Bootstrap, and Flask-React, we have developed a comprehensive web application. Our solution empowers employees, staff, or students to place food orders conveniently through a user-friendly dashboard. The system generates a unique QR code for each order, simplifying the pickup process at the food vendor. Apart from food ordering, employees or students can also book slots for cafeteria usage during specific break times, ensuring organized and efficient utilization of cafeteria resources.

ROLES AND RESPONSIBILITIES

- Writing clean, maintainable, and efficient code that is easy to understand and modify.
- Build web applications using frameworks such as Flask,Django
- Participating in code reviews and providing feedback to team members
- Collaborate on project planning, task estimation, and progress reporting.
